

CALIFORNIA CLEANING SUPPLY,LLC

WHO ARE WE

Our laundry detergents are manufactured in modern plants using the best materials, technologies and human resources delivered to comply with the quality expected by our clients. Quality is implicit in everything we do, we are confident that this is the fundamental task of all of us who work at America Fresh, to reach success in order to maintain and enhance the preferences that our clients have towards our products.

OUR VISION

Our vision marks the course of America Fresh® in the long term. Where do we want to go and how will we get there. We are working to create a better future every day. We are helping people feel good, look good and better appreciate life with our brand. We also take action, day to day, that represents great differences for the world, developing new ways to do business, which by doubling the size of our company, permit us to reduce our environmental impact at the same time. We have always believed in the power of America Fresh to improve quality of life. As our company grows, so our responsibilities. We recognize that global challenges such as climate change affect all of us

WHY USE PHOSPATE - FREE DETERGENT ?

As phosphate enters our streams and channels, it acts as a fertilizer causing excessive growth of algae, eventually killing fish and other organisms. Excess algae also reduce recreational activities and negatively affect the taste and smell of potable water.

WHY IS DETERGENT BIODEGRADABLE IMPORTANT?

Non-toxic, biodegradable soaps are definitely important to keeping the environment clean. Modern, green companies are trying to develop products which, above all, keep the environment clean along with cleaning our homes and clothes.
